

BICYCLE MECHANIC COURSE GUIDE - 2022

BICYCLE MECHANICS

Proudly part of **intowork**
Australia

Pedal into a new career

Five reasons why you should pedal into a new career in the Bicycle Industry and enrol in our **bicycle mechanic course**.

1. A LIFELONG CAREER PATHWAY

Much like the automotive trades, individuals can study a nationally accredited Apprenticeship and/or industry certified technical training, to become a qualified Bicycle Mechanic/Technician. A growth industry, such as bicycles, means there are many future opportunities for young people and older career changers to develop skills and build a lifelong career pathway.

2. HIGH EMPLOYMENT OPPORTUNITIES AND A CAREER YOU CAN TAKE GLOBALLY

The bicycle industry is one of the fastest growing sectors in Australia. Bicycles are quickly becoming the go to transportation choice for commuting, fitness and recreation. They are cheap to run, keep you fit and a very practical form of transportation. Furthermore, the rapid growth of Electric Bikes (E-Bikes) is captivating the world and producing a new generation of road, trail and eco-friendly cycling enthusiasts. The modern design and advanced technology of E-Bikes plus traditional pedal bicycles has become very intricate and technical, which means the Bicycle Mechanic/Technician role is more critical than ever. This ensures a bright future and a diverse range of career pathways for anyone seeking to work in this dynamic, fast-paced industry

3. BE A PART OF THE FUTURE OF SUSTAINABLE INDUSTRY

No matter what your philosophical stance on climate change or 'green' initiatives are, the reality is the world is turning green and we all need to contribute to the future health of the planet. That might mean investing in an electric car, taking public transport or riding a bike to work or just using those pins we all have to get around. The contribution can be small and simple, and I think most people now believe they can make a difference even in a small way.

4. WORK & INTERACT WITH A DIVERSE RANGE OF PEOPLE

There is strength in diversity and as a bicycle mechanic you will work with people and communicate with customers from a range of backgrounds and cultures. The bike is the common thread that binds us all together.

5. YOU LOVE BIKES & DON'T LIKE SITTING AT A DESK

You love to ride; for sport & fitness, commuting or as your weekend activity with the kids. More importantly the idea of sitting in an office staring at a screen all day does not excite you.

AUR30220 Certificate III in Bicycle Workshop Operations

PEDAL INTO A CAREER IN THE BICYCLE INDUSTRY

COURSE OVERVIEW:

The Certificate III qualification is aimed at those seeking a career as a Bicycle Technician/Mechanic. The course can be completed as an apprenticeship or fee-for service student.
